

# Florida Nature Prints

*Naming — what works, and exactly what to order*

Locked specs for the Name a piece of Florida products. Keep this next to the printer. Public page:  
floridanatureprints.com/name.html · Studio (private): floridanatureprints.com/studio.html

## 1. The locked kit

One paper size. One bottle. One ribbon. Every certificate design uses this. Do not mix in 4×6 photo paper or short squat jars.

| What               | Exact spec                                                                                                   | Where / how                                                                                                         |
|--------------------|--------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|
| <b>Certificate</b> | 2" × 3.5" portrait mini-scroll (US business-card size). Roll the 3.5" side so the scroll is <b>2" tall</b> . | Avery <b>8371</b> inkjet or <b>5371</b> laser. 10 tear-apart cards per letter sheet. Amazon, Office Depot, Walmart. |
| <b>Bottle</b>      | 50 ml glass with cork, about <b>4–5" tall</b> and <b>1.4" wide</b> . Holds three teeth + rolled card + bow.  | Amazon search: <b>"50ml glass bottles with cork 4 inch"</b> (tall wedding-favor / apothecary style).                |
| <b>Ribbon</b>      | 1/8 inch (3 mm) wide, 8-10 inches per bow. Kraft, sage, or blush.                                            | Any thin satin or cotton twill. One spool lasts many orders.                                                        |
| <b>Mailer</b>      | Small padded mailer. Flat fee \$6 (packaging \$2 + postage ~\$4).                                            | USPS. Cork the bottle first so nothing rattles loose.                                                               |
| <b>Print</b>       | Studio → Print Avery 8371 sheet (10 cards). Load Avery sheet, 100% scale, letter, no fit-to-page.            | floridanatureprints.com/studio.html → Certificate printer                                                           |

**DO NOT BUY: short squat "50 ml" jars about 2" tall (some listings say 50 ml but measure ~2.1" high). A 2" scroll plus a bow will not fit. Also skip 4×6 photo paper — the certificate is not that size.**

## 2. Products and prices

| Offer                       | Price                            | Customer gets                                                                                                       | You ship                                                                       |
|-----------------------------|----------------------------------|---------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|
| <b>Name 3 Shark Teeth</b>   | \$8 + \$6 shipping = <b>\$14</b> | Three real SW Florida teeth, photographed with their names, mini-scroll of all three names, listed in Named by You. | Tall 50 ml cork bottle: 3 teeth + 2×3.5 card rolled with a bow. Padded mailer. |
| <b>Name a Hibiscus</b>      | \$4 optional mail +\$2           | Named image by email. Joins the named hibiscus gallery.                                                             | Email the named photo. Print/mail the mini-scroll only if they paid +\$2.      |
| <b>Name a Gallery Photo</b> | \$3 optional mail +\$2           | Personalized version of a gallery photo by email. Named by You section.                                             | Same as hibiscus.                                                              |

Ten certificate designs (customer picks one; all the same 2×3.5 size): Gulf Dusk, Marsh Sage, Shell Ivory, Hibiscus Blush, Storm Indigo, Sand Linen, Palm Grove, Coral Dawn, Moon Gulf, Sunrise Peach. Default if they skip: Shell Ivory.

### 3. SOP — Name 3 shark teeth

Do these in order. Check them off on the studio order.

- 1 **Order email arrives.** Open [floridanatureprints.com/studio.html](http://floridanatureprints.com/studio.html) (bookmark it). Click **New order**. Copy customer name, email, address, the three names, and the certificate design.
- 2 **Match payment** to the email. Check “Payment matched.”
- 3 **Lock names / assign IDs.** Studio gives numbers like FNP-T-2026-0001, 0002, 0003. Status becomes Names locked.
- 4 **Pick three real teeth.** Photograph each with its name (linen, same look as the shop trio photo). Save photos in `images/named/` when you want them on the website.
- 5 **Print.** Studio → Certificate printer → load the order → **Print Avery 8371 sheet**. Tear out one card. (Keep extras for reprints.)
- 6 **Roll.** Roll along the **3.5” side** so the scroll is **2” tall**. Not the other way — a 3.5”-tall roll will not fit the bottle.
- 7 **Bow.** Tie 1/8 inch ribbon, small bow. Trim tails so they do not snag the cork.
- 8 **Bottle.** Three teeth first, then the scroll. Cork firmly. Use only the tall 4–5” / 1.4” 50 ml bottle.
- 9 **Mail.** Small padded mailer, USPS, \$6 already collected. Add tracking on the studio order. Status: Sent.
- 10 **Publish.** Mark published. Registry → Download named-registry.js → replace `js/named-registry.js` → upload / push the site.

### 4. SOP — Hibiscus (\$4) and gallery photo (\$3)

- 1 Add the order in studio. Lock the name → FNP-H-... or FNP-P-...
- 2 Hibiscus: use the flower they picked (or shoot a new one). Photo: use the gallery title they chose.
- 3 Add the given name onto the image, small and tasteful (Photos app text is enough).
- 4 Email the named image.
- 5 If they paid +\$2 to mail the card: print Avery 8371, mail the mini-scroll in a first-class envelope (no bottle).
- 6 Mark sent, then published. Same named-registry.js download as above.

### 5. How to print (Avery 8371)

- 1 Load **Avery 8371** (inkjet) or **5371** (laser) — 10 cards, 2” × 3.5”, letter sheet.
- 2 Studio → Certificate printer → Print Avery 8371 sheet.
- 3 Print dialog: paper size **Letter**, scale **100%**, do **not** “fit to page.”
- 4 Cards sit 2 across × 5 down. Tear on the perforations. No scissors needed.
- 5 Fallback if you are out of Avery stock: Print 8-up on letter cream cardstock, cut to 2” × 3.5” with a paper cutter.

### 6. Studio tracker (behind the scenes)

Private page — not in the public menu. Bookmark [floridanatureprints.com/studio.html](http://floridanatureprints.com/studio.html). Orders save in this browser; use **Download backup** so you do not lose them.

Status path: New → Names locked → Photographed → Certificate printed → Packed → Sent → On gallery. IDs print on the card: **FN-P-T-** (tooth), **FN-P-H-** (hibiscus), **FN-P-P-** (photo) + year + number (example FN-P-T-2026-0001).

## 7. Restock / to-do chart

Keep these on the shelf. Reorder before you run out.

| Item                                | Buy                                                              | Have on hand                              | ✓ |
|-------------------------------------|------------------------------------------------------------------|-------------------------------------------|---|
| Avery 8371 (inkjet) or 5371 (laser) | Amazon / Office Depot / Walmart — 2" × 3.5", 10/sheet            | 1 pack (100–250 cards)                    |   |
| 50 ml tall cork bottles             | Amazon: "50ml glass bottles with cork 4 inch" — 4–5" H × ~1.4" W | 12–24 bottles                             |   |
| 1/8 inch ribbon                     | Kraft, sage, or blush. 8-10 inches per order.                    | 1 spool                                   |   |
| Small padded mailers                | USPS-size for a 50 ml bottle                                     | 25+                                       |   |
| Fossil shark teeth                  | Your SW Florida finds                                            | Enough for upcoming orders (3 per naming) |   |
| Hibiscus photos                     | Your shots in images/hibiscus/ — listed in js/config.js          | Replace starters anytime                  |   |

### Each naming order (when an email comes in)

- Add in studio.html
- Payment matched
- Names locked (IDs assigned)
- Photographed
- Printed (Avery 8371)
- Rolled + bow + bottled (teeth only)
- Shipped / emailed
- Published → download named-registry.js → upload site
- Download studio backup JSON

## 8. Website files (only if something breaks)

Daily fulfillment does not need these. After you publish, replace **js/named-registry.js** from Studio. Public shop: name.html. Tracker: studio.html. Prices and bottle spec: js/config.js (naming). Designs: js/certificates.js. Hibiscus photos: images/hibiscus/. Named photos: images/named/. This SOP: charts, to do, instructions, SOP's / Naming-SOP-what-works.pdf.
